

```
#include <stdio.h>

void main(){
    FILE *fptr;
    char oku[100];
    char oku2[100];
    char oku3[100];
    long sayi=0;
    float ondsayi=0.0;

    fptr=fopen("metin.txt","r");
    fscanf(fp, "%s %d %f", oku, &sayi, &ondsayi);
    // fscanf(fp, "%s %s %s", oku, oku2, oku3);
    fclose(fp);

    printf("%s %d %f", oku, sayi, ondsayi);
    // printf("%s %s %s", oku, oku2, oku3);
}
```
