1. Write a function that does a 3-way swap.

2. Write a function (int strlen(char *mystr) ) that computes the length of mystr.

3. Write a function (void strcpy(char *deststr, char *srcstr) ) that makes a copy of string srcstr to string deststr.

4. Write a function (void strconcat(char *deststr, char *srcstr1, char *srcstr2) ) that concatenates two strings srcstr1 and srcstr2 and constructs deststr.

5. Write a function (void checkPal(char *mystr) ) that prints whether the string mystr is a palindrome or not.
